

Reasons to choose Creative's Managed File-as-a-Service Solution

Are slow file transfer speeds and inconsistent datasets giving you a headache? Infrastructure complexity, unstructured data and increasing file sizes make it harder than ever to store, manage and protect data across multiple locations.

Creative's managed File-as-a-Service solution revolutionises storage, access and management of files across global regions, delivering a truly local, high performance file experience and ensuring data is always available, secure and up-to-date.

Benefit from:

SOLUTION DESIGN Experts rightsize and optimise your environment.

TECHNICAL SUPPORT Specialists design, deploy, optimise and manage 24/7.

MANAGEMENT Data is efficiently managed, always available and securely stored.

BUSINESS CASE One globally-accessible data set consolidating storage footprint.

BUDGET Cost effective, transparent monthly costs with tailored solution and easy scalability.

USER EXPERIENCE Local file experience with improved version control, reduced downtime and frustration.

ACCESSIBILITY Everyone can access the same data at near zero latency to collaborate in real-time.

COLLABORATION Real-time collaboration across continents as if your team were in the same room.

VERSION CONTROL Consolidates files into a single global data source that's always available, secure and up-to-date.

RESILIENCE Robust security with immutable data protection enabling quick recovery.

SECURITY Data impervious to cyberattacks and other damage.

COMPLIANCE Meets requirements for data availability, security and compliance at scale.

SCALABILITY Burst capability to meet ever-changing business needs.

FUTURE-PROOFING Quickly and easily harness cloud-native machine learning and AI.

SUSTAINABILITY Data centres operate on 100% renewable energy with industry leading PUE.
