SECURITY OPERATIONS CENTRE AS-A-SERVICE (SOCaaS)

**Strengthen defences to stop
cybercrime in its tracks**

Creative ITC

**ARCTIC
WOLF**

Safety is a state of mind

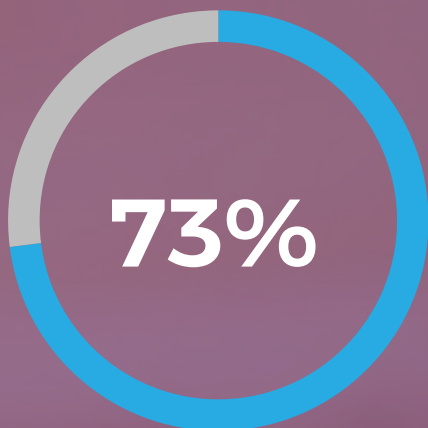

Cybercrime is on the rise. Criminals are increasingly exploiting employees as the weak link, with phishing and ransomware attacks on the rise and password piracy waiting in the wings. None of which is helped by the mass uptake of remote working.

It's well known that the difference between an attack failing or succeeding largely depends on speed of action. But even when organisations invest in the latest technologies to boost threat detection and response, breaches still occur. All too often the problem is not because a tool failed to raise an alert, but because it was missed or ignored.

IT teams are overworked and lack the confidence to stem attacks. Over a quarter (27%) don't feel equipped to spot a cyberthreat, with an alarming 30% admitting to not knowing how to use their organisation's security tools effectively. Many feel overstretched and burnt out and are thinking about resigning through work pressures and cancelled leave. Continuing to carry the cost of highly-skilled cybersecurity staff and experiencing the headache of arranging sickness and holiday cover really isn't the way.

Thankfully, now you don't have to.

**of in-house teams
lack the capability to
fend off cyberthreats**

**of businesses
overwhelmed
by security alerts**

**have ignored
a cybersecurity issue
to prioritise another
business activity**

**ignore
security alerts**

Adopting expert-led operations

It's time to stop adding tools and complexity and start building operations with cybersecurity experts truly empowered to lead the response.

Our Security Operations Centre as a Service (SOCaaS) solution is a 24/7 managed security operations service to boost internal security and IT teams and ensure your organisation benefits from a more robust, proactive security posture.

Using the cloud-native Arctic Wolf® Platform, highly trained security experts work as an extension of your team. We move fast and effectively when time is a critical factor to ensure customers remain safe and protected. We make it fast and easy for organisations of any size to deploy world-class security operations that continually guard against attacks in an efficient and sustainable way.

We provide clients with an immediate response to threats and apply this learning to strengthen resilience over time.

TACTICAL RESPONSE

The Triage Team focuses on tactical approaches to incidents as soon as they arise and collaborates with the customer until an incident is resolved.

STRATEGIC IMPROVEMENT

The Concierge Security Team focuses on the strategic implications of an attack, helping the customer identify areas of improvement and strengthen security operations over the long term.

Comprehensive 24x7 Managed SOC

Managed Risk

Prevents known attacks **BEFORE** they occur by limiting the attack surface

Managed Detection and Response

Detects attacks **DURING** and **AFTER** they occur

Why Arctic Wolf?

Our innovative platform and concierge delivery model enable us to provide better protection in a way that is uniquely fast and cost effective.

How our SOCaaS solution stands out from the pack

The Arctic Wolf Platform

Processing over 200 billion events per day, driving faster threat detection, simplifying incident response and eliminating alert fatigue.

1

Concierge Security® Team (CST)

Continuously monitoring security events enriched and analysed by the Arctic Wolf Platform, improving your overall security posture.

2

Predictable Pricing

No limits placed on data collection. The more data we collect and store on your behalf, the better we are at bolstering your security posture.

3

Core Technology Ownership

We control our entire technology stack and roadmap – delivering functionality faster for our customers.

4

Strategic Guidance

Leveraging their security expertise combined with knowledge of your environment, CSTs introduce ways to improve your posture along your security journey.

5

Broad Visibility and Coverage

Providing enhanced visibility on-premises (endpoint, network, any log source) as well as cloud (SaaS, IaaS).

6

Benefits

Creative Security Operations Centre as a Service enables you to:

- ✓ Cost-effectively acquire cybersecurity operations expertise
- ✓ Better protect through around-the-clock monitoring and proactive threat hunting
- ✓ Quickly detect, respond, and recover from attacks
- ✓ Deliver actionable insights where you need them most
- ✓ Continuously improve security posture and harden defences

Ready to make your business more resilient?

Combining our SOCaaS solution with complementary capabilities like Backup as a Service, Disaster Recovery as a Service and Office365 Backup as a Service, Creative clients benefit from true resilience in an ever-evolving threat landscape.
