CISCO WEBEX CLOUD

Unburdened by the physical limitations of on-premises solutions, Cisco WebEx Cloud is a highly available and secure service-delivery platform with unmatched, performance, Integration flexibility and enterprise-grade security. Cisco WebEx Cloud allows organisations to give users what they need to collaborate; when, where, and how they need it.

BENEFITS OF THE WEBEX CLOUD

- ✓ Taking advantage of applications delivered through the WebEx Cloud helps you shift the balance from capital expenses toward operational expenses. Purchasing, implementing, maintaining, and updating on-premises hardware and software are not trivial IT tasks. The WebEx Cloud offers ease of deployment and application delivery. Because applications are provisioned through clouds, users automatically have access to the latest versions.
- ✓ The platform also uses highly secure data centers located strategically near major Internet access points worldwide, routing data, audio, and video on dedicated, high-bandwidth fibre essentially eliminating lag time and interruptions. Using secure connections reduces the scattering of packets and simplifies reassembly.
- ✓ Not using Cisco CUCM? One of the key advantages of the suite enables customer to use Cisco WebEx cloud with other telephony providers, and can be easily integrated into existing platforms.

WHY CREATIVE?

Creative are Cisco HCS specialists, and have expertise in designing, deploying, supporting and training customers around the entire collaborative suite of products. One of the key elements of Creative's approach is the realisation that their client's requirements are all different and no one solution fits all.

QUICK FACTS

Creative are growing 25% year on year and boast an impressive customer retention and referral ratio of 83%. With global reach (offices across 5 continents) their company directors have over 50 years of combined technical experience.

ADVANTAGES OF THE WEBEX® CLOUD COLLABORATION INCLUDE:

AVAILABILITY

Meets on-demand collaboration, easily accommodating usage peaks.

RELIABILITY

Uses Cisco data centers that mirror all sites, sessions, and connection information, enabling immediate data restoration after a broken connection.

SCALABILITY

Expands with your business growth and supports thousands of concurrent users 24 hours a day.

APPLICATIONS THAT ALSO RUN ON CISCO WEBEX CLOUD INCLUDE;
