

NETWORK MONITORING MANAGED SERVICE

Creative ITC

Working with the industry leading network monitoring provider, Solarwinds, our managed service enables us to see symptoms of network problems long before they become a problem or outage.

We've developed this critical service for customers needing dedicated IT monitoring resources without the headache of deploying and operating the necessary tools.

It also enables IT departments to maximise the use of their investment, as many businesses typically only using 20% of the Solarwinds monitoring capability.

Whether your challenges are related to networks, servers, applications, storage or virtualization we can manage today's dynamic IT environments whilst eliminating outages to your business.

WHEN SHOULD THIS SERVICE BE USED?

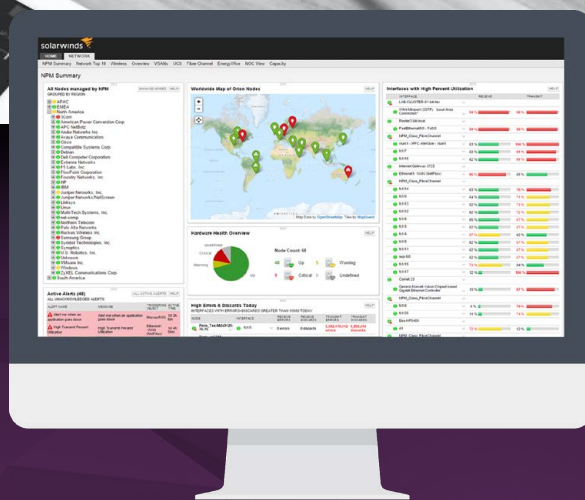

The service can be utilised at any point in a customer's business lifecycle, however we firmly believe prevention is always better than cure, and a good NMS strategy is key to a smoothly functioning IT infrastructure.

We know that if used right from the start this solution can head off problems and catch critical faults well before they bring business services down meaning savings in time, efficiency and productivity.:

- ✓ **Keeping NMS systems up-to-date to reflect your real network**
- ✓ **Assisting with the creation of bulk network change templates**
- ✓ **Developing custom reports of business services availability**

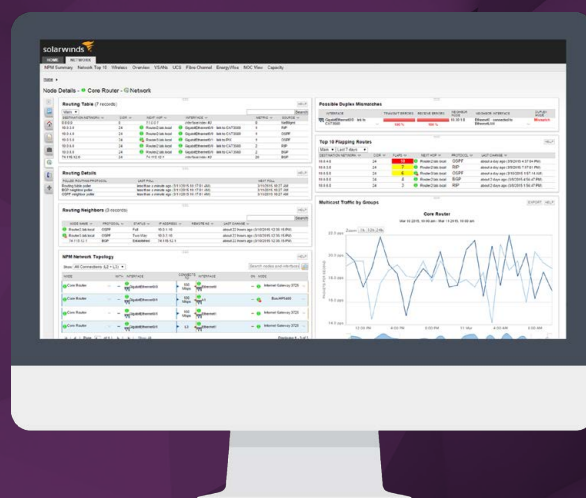

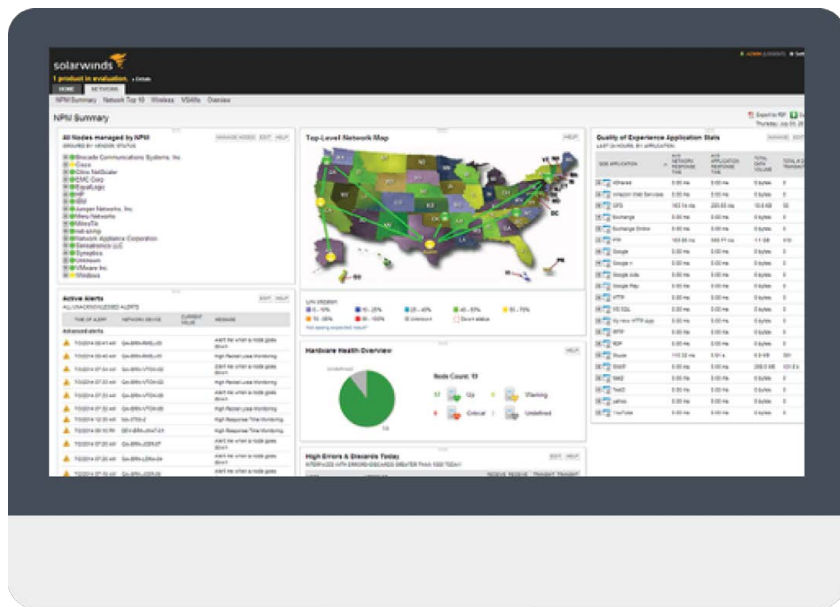

solarwinds

WHO USES THIS TOOL?

- ✓ Any business with various network management systems that needed to be optimized in order to provide return on their IT investment.
- ✓ Organisations that don't have the bandwidth for dedicated IT resources available for analyzing, mapping, tracking, locating failing systems and ensuring business services run at peak performance.
- ✓ Companies wanting the ability to generate service level reports.

WHAT ARE THE BENEFITS?

Our Network Monitoring Managed Service is dedicated to monitoring your company's infrastructure systems to ensure business services run at peak performance. This includes

- ✓ **Manages all virtualization services to get an end-to-end view of your IT infrastructure.**
- ✓ **Ensures complete visibility of systemic performance.**
- ✓ **Keeps systems' performance from downgrading.**

SKANSKA

Creative's Managed Service gave us the visibility we needed in order to invest correctly within our company, it just made our life a little easier because they came in, deployed it and then configured it exactly the way we wanted to see it. Having the Alerts and reports all customized was great, thanks guys

Russ Fry

Head of IT Infrastructure and Security, Skanska
