Our portfolio covers everything from ultra-dependable connectivity for high-speed, low-latency trading, to increased data protection or IT compliance.

We'll tailor the solution to your specific needs and ensure minimal disruption to your business and customers. That means taking risk out of the equation

CREATIVE ITC SOLUTIONS

“

We were pleasantly surprised by the substantive response to the RFP. What was clear to us was that Creative ITC thoroughly understood what we required, and how it was to be delivered and managed.”

Eunice Teixeira Head of IT in London

OUR CUSTOMERS

ARUP

CPA GLOBAL®

BDP.

SHEPPARD ROBSON

1

CASE STUDY

In moving to an agile and cost-effective IT model, CPA Global wanted flexible service levels, while making it easier for engineers in different time zones to resolve issues. The company sought a partner to help realise that vision and managed to achieve less operational risk with greater network uptime, 25% savings on IT support and more informed investment decisions.

CPA GLOBAL®

2

CASE STUDY

BDP wanted to boost their project delivery and client satisfaction through BIM Level 2 adoption, with a ready-made path to achieving Level 3 in the future, but previous attempts to realise this using a common virtual desktop infrastructure (VDI) had been unsuccessful.

BDP.

“It was refreshing to see a VDI platform specifically designed for our industry and achieving BIM Level 2 maturity, which was a major driver,” says Alistair Kell, Principal and Director of IT and Process for BDP

3

CASE STUDY

Tilney Group was on a journey to become the UK leader in financial planning, wealth and investment services. This bold plan relied on organic growth and timely purchases of complementary companies. They needed to meet aggressive merger, improve VDI performance and reduce IT complexity and expense.

TILNEY

“Failure wasn’t an option. Everything had to be in place on day one. Short on time and resources, we needed a trusted partner to help make it happen.” says Laura Lee, Head of IT Operations.
