

SECURITY OPERATIONS CENTRE AS-A-SERVICE (SOCaaS)

Strengthen defences to stop
cybercrime in its tracks

Safety is a state of mind

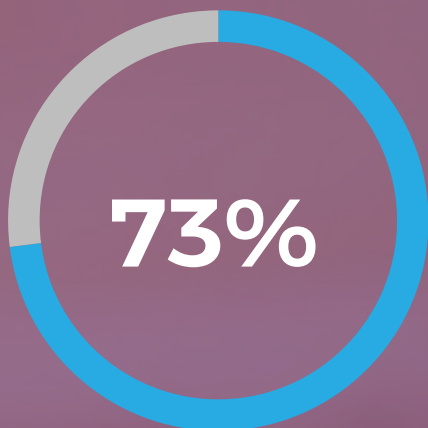

Cybercrime is on the rise. Criminals are increasingly exploiting employees as the weak link, with phishing and ransomware attacks on the rise and password piracy waiting in the wings. None of which is helped by the mass uptake of remote working.

It's well known that the difference between an attack failing or succeeding largely depends on speed of action. But even when organisations invest in the latest technologies to boost threat detection and response, breaches still occur. All too often the problem is not because a tool failed to raise an alert, but because it was missed or ignored.

IT teams are overworked and lack the confidence to stem attacks. Over a quarter (27%) don't feel equipped to spot a cyberthreat, with an alarming 30% admitting to not knowing how to use their organisation's security tools effectively. Many feel overstretched and burnt out and are thinking about resigning through work pressures and cancelled leave. Continuing to carry the cost of highly-skilled cybersecurity staff and experiencing the headache of arranging sickness and holiday cover really isn't the way.

Thankfully, now you don't have to.

**of in-house teams
lack the capability to
fend off cyberthreats**

**of businesses
overwhelmed
by security alerts**

**have ignored
a cybersecurity issue
to prioritise another
business activity**

**ignore
security alerts**

Adopting expert-led operations

It's time to stop adding tools and complexity and start building operations with cybersecurity experts truly empowered to lead the response.

Our Security Operations Centre as a Service (SOCaaS) solution is a 24/7 managed security operations service to boost internal security and IT teams and ensure your organisation benefits from a more robust, proactive security posture.

Using the cloud-native Arctic Wolf® Platform, highly trained security experts work as an extension of your team. We move fast and effectively when time is a critical factor to ensure customers remain safe and protected. We make it fast and easy for organisations of any size to deploy world-class security operations that continually guard against attacks in an efficient and sustainable way.

We provide clients with an immediate response to threats and apply this learning to strengthen resilience over time.

TACTICAL RESPONSE

The Triage Team focuses on tactical approaches to incidents as soon as they arise and collaborates with the customer until an incident is resolved.

STRATEGIC IMPROVEMENT

The Concierge Security Team focuses on the strategic implications of an attack, helping the customer identify areas of improvement and strengthen security operations over the long term.

Comprehensive 24x7 Managed SOC

Managed Risk

Prevents known attacks **BEFORE** they occur by limiting the attack surface

Managed Detection and Response

Detects attacks **DURING** and **AFTER** they occur

Why Arctic Wolf?

Our innovative platform and concierge delivery model enable us to provide better protection in a way that is uniquely fast and cost effective.

How our SOCaaS solution stands out from the pack

Benefits

Creative Security Operations Centre as a Service enables you to:

- ✓ Cost-effectively acquire cybersecurity operations expertise
- ✓ Better protect through around-the-clock monitoring and proactive threat hunting
- ✓ Quickly detect, respond, and recover from attacks
- ✓ Deliver actionable insights where you need them most
- ✓ Continuously improve security posture and harden defences

Why Creative

Creative ITC is a multi-award-winning cloud and digital transformation company. We consistently grow and invest in our technical support organisation. Differentiated and market-leading, our ratio of engineers to office staff is 4:1, significantly above our peers. We recruit the best talent and continually push them to advance their technical certifications. Each specialist holds, or is close to attaining, the highest qualifications in their field. That's why Creative is a trusted partner for some of the world's biggest brands, involved in the largest cloud and digital transformations.

Combining our SOCaaS solution with complementary capabilities like Backup as a Service, Disaster Recovery as a Service and Office365 as a Service, Creative clients benefit from true resilience in an ever evolving threat landscape.
